

Software release note

Simrad SX90 SW 2.1.8

Introduction

This document describes the software and other changes introduced with the following new software versions:

- **SX90 SW 2.1.8**

This software controls all functionality in the Simrad SX90 sonar. This includes transmission and reception, beamforming, interfaces with external peripherals and sensors, and all user interface (sonar presentations and menus).

Software changes

This release only rectifies software bugs that have been reported by our customers, and/or detected during software testing. No new functionality has been added.

Documentation changes

New revisions of the Quick Start Guide, Operator and Reference manuals have been provided. The reference manual is also provided as context sensitive online help on the products, as well as a separate website for easy online access to the information.

All documents can be downloaded from the product website: www.simrad.com/sx90

Do I need the new software?

We strongly recommend that all users with older software versions upgrade their sonar systems.

Do I need to upgrade?

Nothing happens if you do not wish to upgrade. However, you will

then not be able to take advantage of the changes that have been implemented.

As a general rule, we always recommend that the latest software version is used on our products.

How do I perform the update?

End users are not permitted to perform this software update. To do the software upgrade you must contact your local dealer.
